#### ABSTRACT

Moscow Radar Institute NII 108 is reported to be an important radar research institute. No physical features or activity that reveal the function of the institute have been observed on photography. The institute contains eight buildings, primarily multistory administration-type buildings.

This report contains a description of the facility, an annotated photograph, and mensural data.

#### INTRODUCTION

Moscow Radar Institute NII 108 is located in the center of the city of Moscow, 2.0 nautical miles northeast of the Kremlin at Number 20 Novaya Basmannaya Ulitsa.

25X1

#### BASIC DESCRIPTION

The Moscow Radar Institute NII 108 (Figure 1) contains a large, irregularly shaped administration/engineering building, a six-story, T-shaped administration/engineering building, two small administration buildings, and four small shop buildings. Total floorspace for the institute is approximately 24,300 square meters (262,000 square feet). The institute is road served only, and could use city utilities. It is reported to be fenced, but no security measures are discernible.

The institute has been in existence since World War II,<sup>1</sup> but was first imaged on [ ] photography on [ ]. Since that time no significant changes have been observed at the installation.

25X1D

This institute is reported to be the main electronics research institute in the Soviet Union.<sup>1</sup> It could be engaged in the research and development of radars for use in the guided missile and space programs; however, these functions are not revealed on available photography.
